The Hradek plant near Rokycany was originally a plant of the Prague Iron Company, but after nationalization the factory became a part of the United Steel Works, National Corporation. A new rolling mill has been constructed as a part of the Five Year Plan. It is equipped with six pre-heating furnaces (predehrivaci) and a chimney 45 m. high. At the same time the steel works were enlarged by the addition of a new Martin furnace. The two original Martin furnaces are being repaired. Teplotexna of Domazlice built the rolling mills and chimney and installed the furnaces.
